

Stay safe, Indiana State! Mobile ticketing allows for safer and more sanitary entry for all fans and patrons through contactless delivery. See the steps below on how to access your mobile season tickets.

1. To access season tickets on your mobile device, sign in to your MySycamore Account with the email connected to your tickets. We recommend adding the site to your bookmarks or favorites tab. <https://am.ticketmaster.com/indianastate/>

2. After signing in, click the menu button and select "My Events". All your season events will display. Click on the event you would like to access tickets for.

3. Select what ticket you would like to access. Your ticket will appear with a QR code for scanning.

To beat slow network connections at the gate, click "Add to Digital Wallet" below your QR code.

4. When at the gate, open your phone's Digital Wallet and select what ticket you would like to scan.

5. That's it! Hold your phone up to the ticket scanner and go!

PLEASE NOTE: Screenshots are not a valid form of your ticket. You **MUST** present a barcode via your MySycamore Account or through your Digital Wallet.
